36V MultiVolt Brushless 3/4" High-Torque Impact Wrench (Bare Tool) **WR36DAQ4**

MULTIVOLT

The future of the construction industry is cordless technology. Metabo HPT introduces a cordless (and/or corded) solution that meets the power output demand on a jobsite that previously could not be met in a cordless platform. MultiVolt technology is the solution. MultiVolt offers the power of a corded tool, the freedom of a cordless platform and the choice to operate the tool with a battery or plug into an outlet.

CHOICE

Metabo HPT's MultiVolt platform gives you the choice to go cordless or plug in (all with the same tool), eliminating the need to have a cordless tool and a corded version available on the jobsite. Choose your power source to best suit the application. Go cordless for freedom and portability on the job or, if there's power available, insert the MultiVolt AC Adapter and reserve the MultiVolt batteries.

POWER

The MultiVolt 36V battery uses higher capacity Lithium Ion cells for longer runtime and increased power output. Most common power tool batteries use 18650 cells, but the MultiVolt battery uses 21700 cells which allow for the greater power and approximately 46% more capacity. The battery delivers 4.0Ah of runtime at 36V in MultiVolt tools. It can also power Hitachi / Metabo HPT 18V cordless tools for even more flexibility. When the MultiVolt battery is used with the 18V tools, it generates an impressive 8.0Ah of run time.

SAFETY

Experience a safer jobsite by leaving the cord behind and choosing cordless when a cordless tool makes sense for the application. Go cordless when you don't have access to power and need to be able to move where the job takes you. When you do have access to power, save those batteries for later and just plug in with the adapter (ET36A).

3/4" SQUARE DRIVE

With friction ring and pin detent to provide a strong grip on sockets and accessories when attached

IP56 COMPLIANT

To add a degree of protection against dust and water exposure

4-STAGE SPEED SELECTION

Provides up to 812 ft-lbs of torque (1,328 ft-lbs nut busting), 0-600 to 1,500 RPM, & 0-1,200 to 2,900 BPM for precision and control during a variety of applications

LARGE RUBBER BUMPER

Heat-resistant bumper protects the tool, workpiece and the user when in use

AC/DC CONVENIENCE

Tool can be powered by MultiVolt battery or AC Adapter (Sold Separate)

metabo HPT
DURABILITY FIRST

FEATURES

- Brushless Motor Technology for more run time, increased power and extended durability with essentially no maintenance
- Responsive variable speed trigger provides complete control during the application
- Built-in LED light effectively illuminates dark work spaces
- Ergonomic grip & center balanced design to reduce fatigue during extended use
- Heat-resistant rubber bumper protects the tool, workpiece and the user when in use
- Lifetime Tool Warranty

SPECIFICATIONS

Drive	3/4" Square
Max Tightening Torque	812 ft-lbs
Max Nut-Busting Torque	1,328 ft-lbs
Speed Settings	4
No-Load Speed	0-600 / 1,500 RPM
Impact Rate	0-1,200 / 2,900 BPM
Variable Speed	Trigger
Weight (w/ Battery)	8.8 lbs

OPTIONAL ACCESSORIES

Starter Kit	UC18YSL3B1
Adapter	ET36A
Battery	372121M
Charger	UC18YSL3
