1 Prepare the door and check dimensions

If drilling a new door, use the supplied template and the complete door drilling instructions available at www.kwikset.com/doorprep.

A Measure to confirm that the hole in the door is either 2-1/8" (54 mm) or 1-1/2" (38 mm).

B Measure to confirm that the backset is either 2-3/8" or 2-3/4" (60 or 70 mm).

C Measure to confirm that the hole in the door edge is 1" (25 mm).

D Measure to confirm that the door is between 1-3/8" and 2" (35 mm and 51 mm) thick.

Note: Additional door preparation may be required for doors with 1-1/2" (38 mm) holes. Consult the deadbolt drilling instructions at www.kwikset.com/doorprep.

2 Install the latch and strike

A Is the door edge chiseled?

YES Use latch "A". If the latch bolt is not already extended, extend the latch bolt as shown.

NO Use latch "B" (not included). If the latch bolt is not already extended, extend the latch bolt as shown.

B Hold the latch in front of the door hole, with the latch face flush against the door edge.

C Is the D-shaped hole centered in the door hole?

YES D-shaped hole. No adjustment is required. Proceed to next step.

NO D-shaped hole. Rotate latch face as shown to extend latch.

D Which latch are you installing?

Latch "A" **OR** **Latch "B"**

E Install strike on the door frame.

⚠ Make sure the hole in the door frame is drilled a minimum of 1" (25 mm) deep.

Longer screws install closest to the door jamb.

3 Install the exterior keypad

A What is the diameter of the hole in the door?

Diameter is 2-1/8" (54 mm)

"D" is required for installation. Install "D" on "F".

OR

Diameter is 1-1/2" (38 mm)

"D" is not needed for installation. Discard "D".

B Locate screws for step 3C and keep them within reach.

C Install exterior keypad and mounting plate.

a

Cable goes underneath latch.

b

Support exterior assembly during mounting plate installation.

Route cable through center hole, then push cable into bottom hole.

c

Keep parallel to edge of door.

Tighten **T** (2x) screws evenly.

d

Insert key and test latch. If latch does not extend or retract smoothly, adjust screws (T). Remove key when finished and make sure the latch bolt is fully extended.

4 Install the interior assembly

A Remove battery cover and battery pack from interior assembly.

a

If the turnpiece is pointing down (as shown above), rotate the turnpiece 180° clockwise until you hear it click. You may need to apply some force.

b

c

Make sure turnpiece shaft is rotated as shown.

Incorrect:

If turnpiece shaft is not oriented correctly, put the cover back on and rotate the turnpiece as shown in step A.

d

Do not install batteries until step 5.

B Install interior assembly onto mounting plate.

a

align

Ensure tight cable connection.

b

Lay excess cable flat inside the bottom of the interior housing.

c

d

U (2x)

bottom hole

5 Set locking and unlocking direction

CAUTION: Your lock will not function properly if this step is not completed. This step will teach your lock the orientation of your door and is crucial to lock operation.

A Install 4 AA batteries in battery pack.

Ensure correct polarity. For best results, use new, non-rechargeable Alkaline batteries only.

B Make sure the door is open and the latch is extended.

C Press and hold the Lock button. Do not release.

D Insert the battery pack and continue holding the Lock button.

E The latch bolt will retract and extend to learn the locking and unlocking direction of the door.

Status LED will indicate success or failure.
Success: LED flashes green
Failure: LED remains solid red

Note: Latch bolt will only retract half way.

If unsuccessful, repeat from step A, moving swiftly between each step.

6 Add user codes (16 max)

Programming Timeout

During programming, if no button is pressed for five seconds, the system will time out (indicated by three beeps and a red flashing keypad), and you will need to restart the procedure.

A Make sure the door is open. Press the Program button once.

B Enter user code. A total of 16 user codes may be programmed.

C Press Lock button once.

D What lights and sounds does the lock produce?

One green flash with one beep

Programming was successful.

Three red flashes with three beeps

Programming was unsuccessful.

Make sure not to pause for more than 5 seconds during programming.

Make sure the user code is not a duplicate and that it is between 4 and 8 digits during your next attempt. Make sure the lock has room for an additional code. If all user code positions are filled, delete a code to make room for this one.

Mastercode

For enhanced security, a mastercode may be used when adding and deleting user codes. For more information about the mastercode, download the Programming and Troubleshooting Guide on the SmartCode 913 page at www.kwikset.com.

*Beeping sound will only be heard if switch #3 (on the lock interior) is in the on position. See "Switches and Status LED Colors" on page 4.

7 Test the lock (review normal operation)

Confirm that the code(s) added in previous step can unlock the door.

Locking the Door

Press Lock button once.

Unlocking the Door

Enter user code.

8 Install the interior cover

Important Information about the interior cover

The window on the interior cover is locked by default to prevent someone from tampering with your lock's settings.

For easy access to the battery pack, unlock the window by removing the security screw.

You can now slide up the window for more convenient access to the programming buttons and the battery pack while the cover is installed.

Cover Installation

a Install cover.

Note: You may need to rotate the turnpiece to align with the turnpiece shaft.

b Install screws.

Battery Pack Access

If the window is unlocked, slide up the window to access the battery pack.

If the window is locked, remove the interior cover and screws to access the battery pack.

SmartCode at a Glance

Re-key the lock (if needed)

Switches and Status LED colors

Switches

On Off

1 2 3 4

Status LED

Switch	Function	Color	Lock Status
1	Door lock status LED blinks every 6 seconds	Blinking green	Unlocked
2	Lock automatically re-locks door 30 seconds after unlocking. Disabled if no codes are programmed.	Blinking amber	Locked
3	Audio	Blinking red	Low battery
4	Not used.	Solid red	Door handing process did not work properly. See the online Programming and Troubleshooting Guide.

System Alerts

Alert	Reason	Solution
	One incorrect code entered.	Re-enter code.
Keypad flashes red three times with three beeps.*	No user code programmed.	Program at least one user code.
	Programming timeout after five seconds. Unsuccessful programming.	Attempt programming procedure again.
Keypad flashes red 15 times with 15 beeps.*	Three consecutive incorrect codes entered.	Re-enter code after 60 second keypad lockout.
Keypad flashes red 10 times with 10 beeps.*	Low battery.	Replace batteries.
Keypad flashes green with continuous beeping sound for two seconds.*	Deadbolt is jammed and stuck in the locked position.	Manually re-lock door. If needed, reposition strike.
Keypad flashes red with continuous beeping sound for two seconds.*	Deadbolt is jammed and stuck in the unlocked position.	Manually re-lock door. If needed, reposition strike.

*Beeping sound will only be heard if switch #3 is on.

Deleting a single user code

Note: All codes may be deleted at once if the mastercode is enabled. For more information about the mastercode, consult the online Programming and Troubleshooting Guide.

- Keep door open. Press Program button once.
- Press Lock button once.
- Enter user code to be deleted.
- Press Lock button once.
- Re-enter user code.
- Press Lock button once.

If unsuccessful
Make sure to enter the same valid code in steps 3 and 5.

⚠ Test code
While the door is open, test the user code to make sure it no longer unlocks the door.

If no button is pressed for five seconds, the system will time out, and you will need to restart the procedure.

Factory Reset

A factory reset will delete all codes associated with the lock.

- Remove battery pack.
- Press and HOLD the Program button while reinserting the battery pack. Keep holding the button for 30 seconds until the lock beeps and the status LED flashes red.
- Press the Program button once more. In 20 seconds, when the LED flashes green and you hear one beep, the lock has been reset.
- Perform the door handing process again to teach the lock the orientation of the door and add user codes to your lock.

Troubleshooting

A complete Programming and Troubleshooting Guide is available on the SmartCode 913 page at www.kwikset.com.

Important Safeguards

- Read all instructions in their entirety.
- Familiarize yourself with all warning and caution statements.
- Remind all family members of safety precautions.
- Protect your user codes and mastercode.
- Dispose of used batteries according to local laws and regulations.

⚠ CAUTION: Prevent unauthorized entry. Since anyone with access to the back panel can change the user codes, you must restrict access to the back panel and routinely check the user codes to ensure they have not been altered without your knowledge. The use of a mastercode can help protect your system's settings.

⚠ WARNING: This Manufacturer advises that no lock can provide complete security by itself. This lock may be defeated by forcible or technical means, or evaded by entry elsewhere on the property. No lock can substitute for caution, awareness of your environment, and common sense. Builder's hardware is available in multiple performance grades to suit the application. In order to enhance security and reduce risk, you should consult a qualified locksmith or other security professional.
